## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 12 recites the limitation " the second substantially opposing portion" and "the first substantially opposing portion." There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-15, 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Edwards (US 2431030). With respect to claim 11, Edwards discloses the following:

- Body having an open end (Fig. 1, item 1)
- First fastening means (item 9)
- Second fastening means (item 14)

With respect to claim 12, Edwards discloses the second fastening means being disposed over the first fastening means, as shown in Fig. 1.

With respect to claim 13, Edwards discloses at least one of the first and second fastening means being a buckle.

With respect to claim 14, Edwards discloses the first fastening means 9 having a first and second length of material operable to engage each other, wherein said lengths engage each other when the user lifts the sack 1 via fastening means 9.

With respect to claim 15, Edwards discloses the first fastening means having at least one grommet 8.

With respect to claim 21, Edwards discloses the first and second fastening means fastening a first and second opposing portions as shown in Fig. 2.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Edwards in view of Berkowitz (US 1587891). With respect to claim 16, Edwards discloses the claimed invention except for the following:

- At least one button secured to the outside and inside of the sack, and corresponding button holes for each said button

However, Berkowitz teaches a similar handbag having a button interface 3 on the outside of the sack, and a corresponding button hole. Also, Berkowitz teaches providing partitions for a handbag, and providing another button 8, which is on the inside of the sack, and a corresponding button hole, as shown in Fig. 3, so as to

Art Unit: 3781

improve storage of items in the sack. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to replace the buckle of Edwards with a button interface, and to add a divider and corresponding button closure to the interior of the sack of Edwards, as taught by Berkowitz so as to provide an alternate closure, and to improve storage capabilities.

### ***Response to Arguments***

7. Applicant's arguments filed 9/28/06 have been fully considered but they are not persuasive. Specifically, Applicant argues that the first fastening means of Edwards is not a fastening means, however a draw cord is a fastening means.

With respect to claim 14, Edwards discloses the second fastening means 9 overlying the first fastening means 9.

### ***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3781

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
